Description

Air curtains produce a wall of continuously flowing air that acts as a thermal barrier against outside air and flying insects. These air curtains maintain interior conditioned temperature and prevent heated or cooled air from escaping through open pass-through locations. When used in restaurants, schools, fast food windows and drive-ins ... air curtains provide protection against insects, dust, odor, fumes, and other contaminant’s. Available in 3 versions, filter only, grill only, and filter and grill. See reverse side.

NOTE

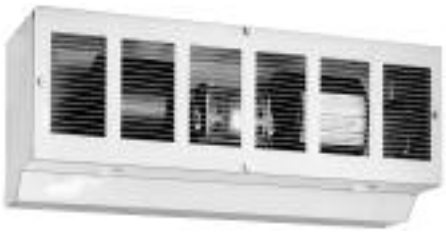

Refer to Environmental Series OIPM for Unpacking, Installation, Operation, Maintenance, General Safety Information and Troubleshooting Chart.
