SPECIFICATIONS:

General: Air curtain unit shall be Leading Edge brand Drive-Thru Window twin 1/15 HP Models.

Cabinet: Unit shall be all-metal, corrosion resistant, galvanized steel housing. The maximum effective width per motor blower assembly shall be no more than 24" and all cabinets shall have structural sidewall supports. Units to have full-length discharge and flush louvers with 1-inch directional vanes for maximum 40˚ sweep for optimum airflow adjustment. Cabinet grill shall allow for no tools access to motor/blower assembly. Electrical junction box shall be mounted on lower right hand side of unit unless otherwise specified.

Motor: Motors shall be heavy duty, 1/15 HP, totally enclosed, permanent split capacitor with each motor shall be resilient mounted and furnished with an automatically resetting Texas Instruments thermal overload and permanently lubricated rubber-sealed ball bearings. Internal motor power cord shall feature quick-disconnect plugs for easy removal of blower base assembly for cleaning and maintenance.

Fan Assembly: Blower wheels and scrolls shall be all metal, corrosion-resistant, galvanized steel. Blower wheels shall be directly driven, double-inlet squirrel cage design.

Mounting: Each unit shall be constructed with keyholes on the rear of the unit for flush wall mounting and supplied with mounting template and an eight-page Operating Instructions and Parts Manual.

Complete Unit: Air Curtain unit shall be UL- or ETL-listed

Optional Accessories:

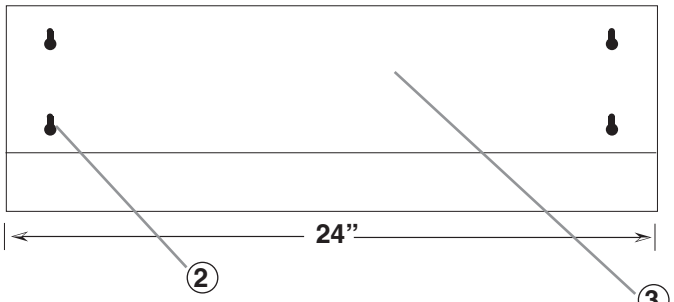

☐ *Instant On/Off Accessories:*
- ☐ Automatic Door Switches- for instant activation upon door opening.

☐ *Mounting Hardware:*
- ☐ Light duty Wall Bracket- for wall mounting of unit from top of cabinet.
- ☐ Medium duty Wall Bracket- for mounting of unit up to 12 inches from wall.

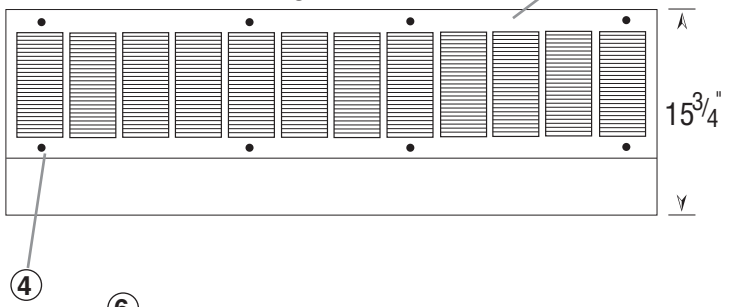

☐ *Filters:* washable aluminum mesh filters.

☐ *Tamper-Resistant Kit:* prevents unauthorized access to air curtain motor/blower assembly.
